1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary examination report and its annexes, if any, established on the international application.
2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.

4. REMINDER

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices)(Article 39(1))(see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

2. CITATIONS AND EXPLANATIONS

Claims 35-80 lack an inventive step under PCT Article 33(3) as being obvious over Greenwood (U.S. 5,499,729) in view of Krueger (U.S. 2,582,489). Greenwood discloses the claimed invention except for the at least one projection. Krueger teaches that it is known to provide a vent disc with a projection (see elements 26 and 31). It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the vent disc of Greenwood with a projection, as taught by Krueger, in order to ensure that the vent disc remains spaced from adjacent surfaces and in order to allow a retaining member to guide/prevent movement of the vent disc.

Claims 45, 57 and 73 - In addition, the modified invention of Greenwood does not disclose that the hardness of the projection is about 70 durometers. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the modified member of Greenwood with the projection having a hardness of about 70 durometers, in order to prevent deformation of the projection when grasped by the user, and since where the general conditions of a claim are disclosed in the prior art, it is not inventive to discover the optimum or workable ranges by routine experimentation.

Claims 35-80 meet the criteria under PCT Article 33(4), because the subject matter claimed can be made or used in industry.
